Social Skills are the foundation for getting along with others. Many of our children today have social difficulties due to spectrum disorders, auditory processing and sensory modulation differences. A lack of social skills can lead to behavioral difficulties in school, inattentiveness, peer rejection, emotional difficulties, bullying, difficulty in making friends, aggressiveness, problems in interpersonal relationships, poor self-concept, academic failures, concentration difficulties, isolation from peers, and depression. Our social skills groups are designed to work with students to avoid these troublesome issues. *Max 10 per group (min. 5); 1.5 hours.*

What will we work on: These Social Groups will focus on over 20 age-appropriate basic social skills, including being a good listener, "reading" other people, being flexible, addressing situations that occur at home, at school, and in the community. Kids Connection teacher/social worker (with program consultation by an occupational therapist) will facilitate the class.
